# IMPORTANT SAFETY INSTRUCTIONS

**First and foremost: this product is a professional lighting and staging equipment and should be used by a professional lighting technician or under the guidance of a professional. When using this product, you must always follow the cautions below:**

1. Read the product manual carefully before use.
2. This product is only suitable to use in a temperature range of -10°C to 40°C.
3. Do not place the equipment near flammable and volatile solvents such as alcohol and gasoline.
4. Before storing the device, make sure it has cooled down completely. When being stored, unplug the power cord from the device. The equipment should be stored in its carrying case or a well-ventilated and dry place.
5. This lighting fixture is not for general illumination and should not be used as such. Individuals with eye injuries or sensitivity should avoid using this lighting fixture.
6. This is a professional light and children are prohibited from using it. Parents or guardians must closely supervise children when they are near the equipment to prevent personal injury caused by colliding with or misusing the equipment.
7. Before using the equipment, please remove the protective cover.
8. When the lighting fixture is on, it is forbidden to stare directly at the light source under any circumstances. High-intensity lighting should only be used under the guidance of a professional lighting technician. Avoid staying in a high-intensity light environment for a long time. If feeling any discomfort, please immediately turn off the lighting fixture, and seek medical attention.
9. When the lighting fixture is on, use it carefully and avoid contacting high-temperature components such as LED light sources to prevent being burnt.
10. Do not use damaged equipment or accessories. Wait for a professional repairman to inspect and repair it before it is confirmed that the equipment can function normally.
11. If the light source is damaged or deformed due to heat, please stop using it and contact the manufacturer, service agents, or qualified repairman promptly to replace the light source to avoid accidents.
12. If the product is cracked due to falling, squeezing, or strong impact during use, please stop use it to avoid being electrically shocked by touching internal electronic components.
13. Do not disassemble the product by yourself. If the product malfunctions, it must be checked and repaired by the manufacturer or authorized repair personnel.
14. Before cleaning and maintenance, be sure to unplug the power supply. To unplug never pull on the cable but always pull the plug itself. This device shall only operate with earthed power outlets or emergency power generators.
15. When cleaning the device, do not wipe it with a wet cloth. Use a dry and soft cloth to wipe off the dirt.
16. If an extension cord is required, it needs to have the necessary capacity to power the respective unit. Using an extension cord with a lower current capacity than the devices need may cause overheating.

17. For some products with long power cords, please place the power cords properly and avoid contact with overheated surfaces that may damage or trip personnel. Please use the original power cords of our manufactory. The damage caused by using non-original power cords is not covered by our repair service.
18. Do not use product accessories that are not recommended by our brand to avoid fire, electric shock, or personal injury.
19. Some products use batteries for power supply. Do not use any batteries, power sources, or accessories that are not specified in the user manual. Please keep batteries and other accessories out of reach of children and infants. If a child or infant swallows a battery or accessory, seek medical attention immediately. If the battery leaks, changes color, deforms, smokes, or emits an odor, remove it immediately. Be careful not to get burned during the removal. A continued use of such batteries may cause a fire, electric shock, or skin burns. Do not use any deformed or modified batteries. Do not disassemble or modify this product or the battery. Do not heat the battery or solder it. Do not let the battery come into contact with fire or water, or subject it to strong external force. Do not insert the battery's positive and negative ends incorrectly, or mix and use old and new batteries or different types of batteries.
20. For some products with built-in lithium batteries, please use a dedicated charger for charging, and follow the correct operating instructions within the prescribed voltage and temperature range.
21. The warranty last for one year. Consumables like batteries, adapters, power cords, and other accessories are not covered by the warranty.
22. The one-year warranty will be invalidated if the equipment is found to have been repaired privately. The related repair costs will be charged.
23. Equipment malfunctions caused by non-standard operations are not covered by the warranty.
24. The safety instructions are based on our factory's strict testing. If there are any changes in the equipment's design and specifications, we reserve the right not to notify you. Customers can visit our official website to check the latest digital version of the instructions and learn about the newest product information.

## Keep these instructions!

## WARNING:

-  High-power LED lights are strictly prohibited from being directly viewed or shining into other people's eyes.
-  Do not unplug the power cord or connecting wires while the light is on to avoid personal injury.
-  Do not cover the heat dissipation port when the lamp is in operation.
-  Keep children away from touching or using this light.
-  As professional lighting equipment, please make sure to operate it correctly according to the user manual.

# PRODUCT INTRODUCTION

Thank you for purchasing our “GVM-800D-III”. This product is specifically designed for photography and videography enthusiast. This product is suitable for use in both outdoor and indoor live stream /video/ photo shoots.

The main features of the product are:

1. Step-less dimming control of RGB and Bi-color output ,allowing for unrestricted control of brightness, color temperature, hue, and saturation. The use of high CRI LED chips helps restoring and enriching the natural color of your subject, providing you with natural looking lighting.
2. APP control: This light can be controlled by your IOS and Android smart mobile devices; as well as be group controlled along with other GVM brand devices that support Bluetooth mesh networking.
3. Build in LCD screen displays you settings and system information, light can be rotate 360 degree along its vertical axis. Paired with foldable barn door giving you more precise control over your lighting.
4. It can simulate 20 different scene lights: Lightning, Cop Car, Candle, TV, Bad Bulb, Party, Disco, Paparazzi, Explosion, Pulsing, Fire, Fireworks, Welding, CCT Loop, Hue Loop, Ambulance, Fire Engine, SOS, STROBE 1, STROBE 2.

We firmly believe that, proper use of this product will greatly enhance your production workflow. We strongly recommend reading the following user guide carefully before using the product.

## DISCLAIMERS

1. Before using this product, please read the text carefully to ensure that the correct operation of the product has been carried out. Failure to follow and not following the instructions and warnings in this document may cause harm to you and others around you, or even damage the product or other surrounding items.
2. By using this product, you are deemed to have carefully read the disclaimer and warning, understand and acknowledge all the terms and contents of this statement, and promise to take full responsibility for the use of this product and the possible consequences.
3. Design and specifications are subject to change without notice.

# PRODUCT PARAMETER

- ◆ Brand : GVM
- ◆ Product Model : GVM-800D-III
- ◆ Product Name : LED Video Lights
- ◆ Product Type : LED Panel Light
- ◆ Features : Multiple Lighting Modes, High CRI LED Chips
- ◆ Control Methods: Self Control (Rotate Mode), Bluetooth APP Control, Wireless Master-Slave Mode
- ◆ Bluetooth Controllable Distance:  $\leq 15\text{M}$
- ◆ Master-slave Controllable Distance:  $\leq 50\text{M}$
- ◆ LED Chips Quantity : 192
- ◆ Color Rendering Index :  $\geq 97$
- ◆ Color Temperature : 3200K~5600K
- ◆ HUE : RGB  $0^{\circ}\sim 360^{\circ}$
- ◆ SAT :  $0\%\sim 100\%$
- ◆ Luminance : 1305lux@1m ; 4990lux@0.5m
- ◆ Light Adjustment Method : Step-Less Adjustment
- ◆ LED Beam Angle :  $120^{\circ}$
- ◆ Power : 40W
- ◆ Product Weight : 1kg
- ◆ Product Size (mm) : 270×263×40
- ◆ Voltage : AC:100-240V
- ◆ Power Supply Mode : DC Input & Battery
- ◆ Power Supply : DC15V/3A
- ◆ Product Material : Aluminum Alloy
- ◆ Cooling : Natural Heat Dissipation
- ◆ Commodity Origin : China. Huizhou

# PRODUCT STRUCTURE DIAGRAM

# INSTALLATION METHOD

- 1 Slide the 5/8" receiver over the spigot/stud at the top of the light stand. Lower it fully down so the receiver fits snugly onto the stand. Tighten the securing knob on the panel light's yoke. Make sure the light does not wobble or spin.

- 2 Insert the diffuser from the side of the light panel.

- 3** Loosen the adjustment knobs on both sides of the yolk then adjust the tilt angle of the panel to your needs, and then tighten the adjustment knobs on both sides of the yolk.

- 4** There are two power supply modes to choose from.
1. Connect the power cord and adapter for power supply.
  2. Purchase two other suitable lithium batteries and use them for power supply.  
( Batteries must be inserted into both slots to deliver power. )

**Battery Installation Slot**  
(Battery Not Included)

**Power port**

# ACCESSORIES

## INSTALLATION METHOD

### Barndoor :

Light control folding can control the Angle of light.

Barndoor are effective way to control the spill of your light. Hold the barndoor up to the light and align the barndoor frame with the mounting holes. Ensure the barndoor flaps open outward and do not block the front of the panel when installed. Insert the included screws into each corner hole through the barndoor bracket into the panel's frame.

# DESCRIPTION OF PRODUCT CONTROL KEYS

- ❶ DC15V power input port.
- ❷ Power switch.
- ❸ Mode control button: Change between modes.
- ❹ Change channel button: While in master/slave mode, press this button to select different channels.
- ❺ Brightness adjustment button: Adjust the brightness level.
- ❻ Multifunctional knob: Short press to switch between color temperature, hue, and saturation. A long press for 3 seconds can activate/deactivate the scene lighting mode. In scene lighting mode, short-pressing the knob can be used to switch between parameter adjustments and scene types, while rotating the knob can be used to adjust the values.
- ❼ LCD screen : displays the current lighting parameters, control modes, channel values, scene number, and more.

# FUNCTION INTRODUCTION & INSTRUCTIONS FOR USE

## ① LCD screen :

The display screen shows the current brightness, control mode, lighting parameters, channel values, and battery level of the light.

## ② Mode types and functions :

- Press the mode button to change the control mode, such as: Rotate, slave, master, or APP.

**Rotate Control mode:** the lighting effect is adjusted by the dimming knob.

**Slave Control mode:** the channels can only be adjusted by the ▲ ▼ buttons, and if the channel of the slaved unit is the same as that of the master unit, they can all be synchronized and controlled together.

**Master Control mode:** the lighting effect and channels are adjusted by the dimming knob, and the slaved unit on the same channels will also be adjusted synchronously.

**APP Control mode:** the lighting effect is adjusted by the APP.

- The multifunctional knob can be used to switch between color temperature, hue, and saturation, while a long press of 3 seconds can activate/deactivate the scene lighting mode.

**CCT mode:** Adjusts the color temperature within a range of 3200K~5600K.

**HUE mode:** Adjusts the hue within a range of 0°~360°.

**SAT mode:** Adjusts the saturation within a range of 0%~100%.

**SC mode:** Can simulate 20 different scene lighting effects, including Lightning, Cop Car, Candle, TV, Bad Bulb, Party, Disco, Paparazzi, Explosion, Pulsing, Fire, Fireworks, Welding, CCT Loop, Hue Loop, Ambulance, Fire Engine, SOS, STROBE 1, and STROBE 2.

### ③ Adjust brightness (BRG):

- In Master mode / Rotate mode, turn the brightness adjustment knob to adjust the brightness.
- In the APP mode, connect to APP and adjust brightness through APP.

### ④ Adjust color temperature (CCT):

- In Master mode / Rotate mode, short press the multifunctional knob to switch to CCT, and then rotate the multifunctional knob to adjust the color temperature.
- In the APP mode, connect to the APP and adjust the color temperature through the APP.

### ⑤ Adjust HUE:

- In Master mode / Rotate mode, short press the multifunctional knob to switch to HUE, and then rotate the multifunctional knob to adjust the color.
- In the APP mode, connect to the APP and adjust the color through the APP.

### ⑥ Adjust SAT:

- In Master mode / Rotate mode, short press the multifunctional knob to switch to SAT, and then rotate the multifunctional knob to adjust the saturation.
- In APP mode, connect to the APP, and adjust the saturation through the APP.

### ⑦ Adjustment scene (SC):

- In Master mode / Rotate mode, short press and hold the multifunctional knob for 3 seconds to enter/exit the scene lighting effects mode. Rotate the multifunctional knob to select the scene, press the multifunctional knob to switch to the parameter settings of the scene, and brightness level can be adjusted for all scene by rotating the brightness adjustment knob. When the current scene is [bad bulb / explosion / breathing light / fireworks], rotating the multifunctional knob can adjust the color temperature. When the current scene is [party / disco / color temperature cycle / color phase cycle], rotating the multifunctional knob can adjust the timing. (Other scenes can only be adjusted by brightness.)
- In the APP mode, connect to the APP and adjust the scene lighting effects through the APP.

### ⑧ **Adjust CH:**

- In Master mode/Slave mode, tap the plus/minus key to set the channel value.
- In APP mode, connect to APP and set the channel value through APP.

### ⑨ **APP control:**

Switch the light to the App mode, connect to the light's Bluetooth with your phone, and you can use the App to control the brightness, color temperature, color, saturation, scene type, channel, and power on/off of the light. If you have other Bluetooth enabled unit, you can also control them through the App.

### ⑩ **Master-slave Mode (Linked control between multiple devices):**

- Prepare two or more units, set one to "Master mode", and the others to "Slave mode", and set the "Master" and "Slaved" unit to the same channel (CH) number. Now the slaved unit can be synchronously controlled through the controller behind the masterunit.
- Prepare two or more compatible units. Ensure all lights are powered on and functioning correctly. Set one light to "APP" mode. This light will act as the master unit for app control. Open the mobile control app on your smartphone, and connect it to the light set to APP mode. Assign a channel to the APP-mode light via the app. Set the remaining lights to "Slave" mode. For each slave light, select the same channel that was assigned to the master (APP-mode) light. Control via app. Once the app is connected to the master light and all slave lights share the same channel, any adjustments made through the mobile app (e.g., brightness, color temperature, FX effects) will synchronously control all connected slave units.

# APP CONTROL

1. Scan the QR code on the back of the user manual to download the APP.
2. Turn on the light, switch to the APP mode, confirm that the phone Bluetooth and APP Bluetooth permission is turned on (Android devices needs to turn on GPS and APP positioning permission). Then launch the "GVM LED" App, enter the Bluetooth search interface (Figure 1), find the Bluetooth device named "BT\_LED" and tap it to connect, after connected successfully, it will automatically enter the light control interface (Figure 2/3/4), at this step, you can control and change settings on the connected light or any slaved unit that are on the same channel to the connected light.

Figure 1

**Note:** Please do not attempt to pair Bluetooth directly on the unit's Bluetooth page, instead directly access the GVM LED App and pair with the available bluetooth.

3. You can save 6 custom light presets in "My Scenes". After changing the custom light settings → click the "📄" icon in the top right corner → pop up the "Save Current Scenes" → click "OK". This light effect can be found in "My Scenes" at this time. (Figure 5)

# QUICK TROUBLESHOOTING

Phenomenon	Check the product	Troubleshooting
The switch indicator does not light up.	1. Check the matching power adapter indicator light up or not.	Make sure the adapter is well contacted with the power plug.
	2. When using lithium battery, make sure there's no "low power" protection.	Charge the battery before using it.
The brightness / color temperature knob is not responsive.	Check if the mode were set as slave mode, brightness and color temperature of the products cannot be changed in slave mode.	Press the "MODE" button for once, and switch the mode from slave mode to master mode.
The product is in the "ON" state, but the display nor the light turns on.	Check if the product is shown "OFF" inside the mobile APP.	Press the "ON/OFF" button once again.
Can't Connect to the APP.	Check whether the device is in APP mode and whether "BT_LED" is displayed on the APP.	Normal steps: 1. Switch to APP mode after booting; 2. Turn on Bluetooth and GPS on the phone; 3. Open the APP, search, and connect to Bluetooth BT_LED.
In RGB mode, the Light doesn't present any colors.	Check whether the saturation (SAT) value is too low or set to 0.	1. In the main control mode / self-control mode, adjust the saturation value with the multifunctional knob. 2. Connect to the APP in APP mode and adjust the saturation value through the APP.

# PRECAUTIONS

1. Please use the matching power adapter or lithium battery with the same specification to power the product. Do not use power adapter with different output voltage parameters.
2. The product is not waterproof, please use it in a rainproof environment.
3. The product is not anti-corrosion, therefore do not let the product touch any corrosive liquid.
4. When using the product, make sure the product is put firmly and prevents falling and damage.
5. If the product will not be used for a long time, please switch off the power to reduce energy loss.

# USE AND PRESERVATION

Do not place the product in a high humidity, strong electromagnetic fields, direct sunlight, or high-temperature environment. If the product will not be used for a long time, please disconnect it power and remove the battery.

**Clean:** Before cleaning, disconnect the power plug. And use a damp cloth instead of any detergent or soluble liquids to avoid damaging the surface layer.

**Power:** Make sure the power is within the demanded range, not too high or too low. Correctly load the battery, in order not damage to the machine.

**Repairing:** If there is a fault or performance degradation, do not unpack the shell by yourself, avoiding damage to the machine and losing the right of maintenance. When there is a fault, do not hesitate to contact us, and we will do our best to deal with the problem.

**Accessories:** Please use the accessories provided by the manufacturer and approved ones, to maximize the performance.

**Warranty:** Do not modify the product, or you will lose the right to maintenance.

Note: this form should be confirmed by the salesperson's stamp.

## Applicable Products

This document applies to the products listed in the relevant "Product Warranty Information" (see instructions below). Other products or components that do not fall within this scope (such as promotional products, gift items, and other components added after the factory) are not covered by this warranty promise.

## Warranty Period

The corresponding warranty period for products and components shall be executed according to the relevant "Product Warranty Information". The warranty period starts from the first day of purchase of the product, and the date of registration on the warranty card at the time of purchase shall prevail.

## How to Obtain Warranty Service

You can directly contact the product salesperson or authorized service agency, or call GVM's after-sales service hotline to contact us and have our service personnel arrange service for you. When applying for warranty service, you should provide a valid warranty card as a warranty certificate to be eligible for warranty service. If you cannot provide a valid warranty card, we may also provide you with warranty service under the circumstance that our products or components are confirmed to be within the warranty scope, but this is not our obligation.

## Cases where warranty does not apply:

If the product meets the following conditions, the warranty and service under this document will not apply:

1. The product or parts have exceeded the corresponding warranty period.
2. Malfunctions or damages caused by incorrect or improper use, maintenance, or storage, such as improper handling, use for purposes other than the reasonable expectations of the product, incorrect insertion or removal of external devices, falling or crushing due to external force, or exposure to inappropriate temperature, solvents, acids, alkalis, water immersion, or damp environments.
3. Malfunctions or damages caused by unauthorized installation, repair, modification, addition, or disassembly by institutions or personnel not authorized by GVM.
4. Modifications, changes, or removals of the original identification information of the product or its parts.
5. Lack of valid warranty card.
6. Malfunctions or damages caused by the use of unauthorized, non-standard or non-publicly released software.
7. Malfunctions or damages caused by force majeure or accidents.
8. Other malfunctions or damages not caused by quality issues of the product itself. In such cases, you should seek solutions from the relevant responsible parties, and GVM will not be held liable. Malfunctions or damages caused by components, accessories, or software not covered by the warranty or beyond the warranty scope that renders the product unable to function properly are not covered by the warranty. Fading, wear, and consumption that is normal during the product usage process are not covered by the warranty.

## Product Warranty and Service Support Information

The product warranty period and service types are implemented according to the following "Product Warranty Information" for each product category, component, and optional equipment:

Product Category	Accessories Name	Warranty Period(Month)	Warranty Service Type
Component	Circuit Board.	12 Month	Customer service repair
Other	Spotlight mount, softbox, adapter, Standard reflector, power cord, battery Handle, light stand, TYPE-C cable, battery slot, battery, Fresnel lens, grid, carrying bag and all other accessories, etc. Consumable or electrically sensitive parts are not covered by the warranty.	None	No Warranty
